QUESTION NO: 1

Which statements are true about user groups? (Select two.)

- A. They can be based on departments, permission levels, or roles.
- B. They control which users are allowed to log in to the Console.
- C. They can be nested within other user groups.
- D. They are enabled or disabled using Access Control Lists.

Answer: A,C

QUESTION NO: 2

Which statements are true about user groups and resources? (Select two.)

- A. Resources are only visible to a user if the user's group has "Read" permissions for the resource.
- B. A group with "inspect" permission enabled allows all users in that group to edit resources.
- C. To change a user's permission to access a resource group, you either change the permissions of the user's group or put the user in a new group with different permissions.
- D. A resource can only be accessed by a user if the user's group has "viewer" permissions for the resource.

Answer: A,C

QUESTION NO: 3

Which tablespace is used by ArcSight to store resources?

- A. ARC\_EVENT\_DATA
- B. ARC\_SYSTEM\_INDEX
- C. ARC\_SYSTEM\_DATA
- D. ARC\_EVENT\_INDEX

Answer: C

QUESTION NO: 4

Which statement is true about ArcSight Database structures?

- A. Data tablespaces typically use more disk space than indices.
- B. Indices typically use more disk space than data tablespaces.
- C. There is no appreciable difference between index and data tablespaces.
- D. The system data tablespace is always much larger than the event data tablespace.

Answer: B

QUESTION NO: 5

Which statement is true about SmartConnectors and FlexConnectors?

- A. FlexConnectors allow creation of SmartConnectors that are tailored to individualized custom situations and specific security event data.
- B. FlexConnectors are plug-and-play, self-programming SmartConnectors.
- C. SmartConnectors do not include tools for customizing FlexConnectors.
- D. SmartConnectors are vendor-specific and must be purchased through the individual device vendors.

Answer: A
